

AMENDMENTS TO THE SPECIFICATION

Please delete the paragraph bridging pages 6 and 6, and replace it with the following paragraph:

The inventors of the present invention have made intensive studies to obtain a fluorine-containing copolymer which can be subjected to polyol vulcanization and has necessary and sufficient amine resistance while maintaining heat resistance, oil resistance and chemical resistance nearly equal to those of conventional fluorine-containing rubbers, and as a result have found that the terpolymer obtained by copolymerizing ethylene, ~~hexafluoropropylene~~ hexafluoropropylene and vinylidene fluoride in a specific ratio has elastomeric property and satisfies the above-mentioned characteristics, and have completed the present invention.

At page 17, please delete the 1st full paragraph and replace it with the following paragraph:

Examples of the tertiary phosphonium salt are, for instance, ~~tetrabutylphosphonium~~ tetrabutylphosphonium chloride, benzyltriphenylphosphonium chloride, benzyltrimethylphosphonium chloride, benzyltributylphosphonium chloride, tetrabutylphosphonium benzotriazole salt, tetrapropylphosphonium benzotriazole salt, triphenylbenzylphosphonium benzotriazole salt, and the like.
